INTRODUCTION

I am an enthusiastic candidate seeking a MERN Stack internship opportunity. With a strong foundation in React.js, MongoDB and Node.js, I am excited to leverage my skills and collaborate with a dynamic team to craft innovative solutions. With a relentless pursuit of knowledge, I continuously explore the latest MERN stack trends. Through personal projects and academic coursework, I have hands-on experience building responsive and scalable web apps, leveraging React.js on the frontend and Node.js on the backend.

EDUCATION

PAF KIET UNIVERSITY

Bachelors of Science in Computer Science (BSCS)   *CGPA:3.08 | (Jan 2020 Dec 2023)*

PROJECTS

GITHUB FINDER: GitHub Finder is a React-based web app for searching and exploring GitHub users and their repositories. It utilizes React Hooks and Context API for state management, Axios for efficient API requests, and React Router for seamless navigation. Check Now   and for source code Click Here

CONTACT MANAGER_APP: Developed a secure MERN app with Node.js, Express, MongoDB, and React, using JWT tokens and Bcrypt. Implemented dynamic features with React Hooks, Context API, and React Router. Successfully deployed on Heroku. Skills: Redux, React Hooks, Node.js, MongoDB, Express, Heroku. Check Now and for source code Click Here

Flutter - APP (Theek-Karo):A mobile app built using Flutter that connects users with local service providers. Designed and implemented the user interface, managed state using providers, and consumed RESTful APIs for real-time data updates. Implemented features such as user authentication, Click Here

NodeJS API: Built a NodeJS API for above Flutter-App project using Express.js framework to handle requests and responses, integrated MongoDB database for storing data, and deployed the project on Heroku Click Here

CERTIFICATIONS & TRAININGS

- Front-End Web Development using JavaScript and React.js
- JavaScript

PROGRAMING LANGUAGES & STACK

- JavaScript
- Node Js
- MongoDB
- Express
- HTML / CSS

TOOLS & SKILLS

- Git Hub Click Here
- Postman for Api Testing
- Heroku for Backend Deployment
- Netlify
- Bootstrap
- Context Api In React

EXPERIENCE

DyCoders *(International Clients based Software Company)*   *Sep 2023 – Oct 2023*
Business Development Intern:
- focused on data scraping and lead generation to support sales and marketing efforts.
